Description :

Burette Stand and Funnel Stand (Product Code: SLE/CH/41) is a polished hardwood stand that holds one burette and one funnel at the same time, with cork-lined jaws, plastic screws and a base standing on four rubber feet. It gives each titration or filtration station a steady, all-in-one support without a separate retort stand and clamps. Made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it is a practical burette stand for student benches in school and college labs across India.

Specifications

Parameter	Detail
Holds	One burette and one funnel
Material	Polished hardwood
Jaws	Cork lined
Screws	Plastic
Feet	Four rubber feet on the base for stability
Base size	330 x 110 mm
Overall height	490 mm

Typical Use

During an acid-base or redox titration, the burette is gripped in the cork-lined jaw above a conical flask while the funnel position holds a small funnel ready for refilling, or supports a filter funnel for a parallel filtration. Cork protects the glass from scratching and grips it without the need to overtighten, and the plastic screws do not rust from acid splashes the way metal ones can. This makes it a tidy fit for school titration kits, with one stand set out at each bench.

Align the burette vertically before tightening the jaw, and place a white tile or sheet of paper on the base under the flask so the end point colour change is easy to see. Wipe spills off the wood promptly with a damp cloth and dry it, and keep the stand away from standing water so the polish lasts.

Manufacturer

Jain Scientific Equipments Private Limited operates as ScienceLab in Ambala, Haryana, and makes laboratory stands, glassware and teaching apparatus. It is registered as an MSME manufacturing enterprise under Udyam UDYAM-HR-01-0003714, and its export consignments are handled under DGFT Importer-Exporter Code AAECJ8618A.
