Description :

Fisher Clamp (Product Code: SLE/CH/43) is a burette clamp moulded in polypropylene, which makes it completely corrosion proof around acids, alkalis and wet benches. A spring-loaded jack in the middle holds the burette in a vice-like grip so it cannot slip, and two tapered wedges lockthe clamp firmly onto a support rod. It comes as a single or double clamp and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for chemistry labs looking for a burette clamp in India that stands up to acid spills and damp benches.

Specifications

Parameter	Detail
Material	Polypropylene, moulded; completely corrosion proof
Burette grip	Spring-loaded jack in the middle giving a vice-like grip; prevents slipping
Rod fixing	Two tapered wedges for a firm grip on rods
Rod diameter	1/2 inch or 3/8 inch
Versions	Fisher Clamp Single; Fisher Clamp Double

Typical Use

The clamp slides onto the vertical rod of a retort stand and is locked in place with its wedges; the burette is then pressed against the spring-loaded jack, which pushes it into the jaws and holds it upright over the titration flask. The single version holds one burette, while the double version holds two side by side, which is useful when a titration uses two solutions or when two students share one stand. Because the whole clamp is plastic, it does not rust or seize if acid or alkali drips onto it during a titration.

Set the clamp at a height that leaves room to swirl a conical flask under the burette tip, and check that the burette hangs vertically before starting. Wipe off any spills after each session. Paired with a sturdy retort stand, it gives a secure set-up for school and college titration practicals in labs across India.

Manufacturer

The Fisher Clamp is made by Jain Scientific Equipments Private Limited, which trades under the ScienceLab name from Ambala, Haryana, producing stands, clamps, plasticware and glassware for teaching laboratories. See our company profile for more.

Related Chemistry Lab Equipment

Supports and glassware used with a Fisher clamp:

- Retort Stand — provides the upright rod the clamp is fixed to.
- Burette — acrylic burette to hold in the clamp.
- Fisher Clamp (Routine Improved Model) — an alternative Fisher clamp model.
