Description :

Test Tube Stand 3 Tier (Product Code: SLE/CH/52) is a moulded polypropylene rack built in three tiers: tubes pass through the upper and middle plates and rest on the base, so they stand straight while their contents stay in view. The layout makes tubes easy to insert and remove, and the rack is autoclavable and can withstand sub-freezing temperatures, so it moves from thebench to the sterilizer or the freezer without a change of rack. It suits chemistry, microbiology andclinical labs in schools, colleges and hospitals, and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, within its lab plastic ware range of school chemistry lab equipment in India and for overseas buyers.

Specifications

Parameter	Detail
Design	3-tier rack (upper, middle and base plates)
Material	Polypropylene (PP)
PP version appearance	Every part coloured and opaque
PC version appearance	Transparent upper and middle plates (please confirm availability)
Sterilisation	Autoclavable
Temperature	Withstands sub-freezing temperatures
Handling	Clear view of tube contents; convenient insertion and removal of tubes

Typical Use

Because each tube is guided at two heights, it stays upright even when only a few places are filled, which is useful for colour-change tests, serial dilutions and precipitation reactions where students need to compare tubes side by side. In microbiology, a rack of culture tubes can go through the autoclave and then be stored cold without transferring the tubes. For sample storage, the rack's tolerance of sub-freezing temperatures means it can hold labelled tubes in a freezer.

Choose the coloured PP rack when you want to colour-code sets, for example one colour per class group or per test series. Wash the rack in warm detergent solution, rinse, and let it dry before autoclaving. Load tubes of a diameter that passes freely through the upper plate; forcing larger tubes can strain the plates.

Manufacturer

ScienceLab is the brand under which Jain Scientific Equipments Private Limited, Ambala, Haryana, makes and exports laboratory racks, stands and teaching apparatus for schools, colleges and laboratories in India and international markets. Details are on the company profile.
