Product Name :

Circuits Kit Bulb Holder

Product Code :

SLE/PHY/31

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Circuits Kit Bulb Holder (Product Code: SLE/PHY/31) is a panel-mounted lamp holder used asa spare component in a Circuits Kit for building simple electric circuits in school science andphysics labs. Teachers order it to replace a lost or damaged holder, or to add extra lamps sostudents can compare brightness in series and parallel. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and physics instruments supplier inIndia, at its own factory in Ambala, as part of its electricity experiment kit range.

Key Details

Parameter	Detail
Component	Bulb holder
Type	Spare component for the Circuits Kit
Mounting	Mounted on a sturdy panel
Design benefit	Panel mounting for ease of use and storage
Product code	SLE/PHY/31
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Circuits Kit Bulb Holder Used For?

A bulb holder turns an invisible current into something pupils can see. Placed in a loop with a cell and a switch, the lamp lights only when the circuit is complete, which makes it the natural first component in lessons on open and closed circuits. Adding a second holder in series and then in parallel lets students compare brightness and discover how current and voltage are shared.

The lamp holder also works as a simple conductor tester: leave a gap in the circuit, bridge it with different materials, and the bulb shows which ones conduct. Because it sits on its own sturdy panel, it can be moved around the bench and packed away easily. Check that bulbs are screwed in firmly before switching on, and allow a lamp to cool before changing it.

What to Specify When Ordering

- The number of spare bulb holders needed for your kits.
- Whether bulbs are also required, and the lamp type your kits use.
- Any other Circuits Kit spares, such as switches or cell holders, to combine in one order.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM that makes this bulb holder at its own licensed factory at Saha, Ambala, Haryana, India. Because the spare comes from the same manufacturer as the rest of its circuits range, schools and dealers can ask us to match it to the kits they already hold.
