Description :

Funnel Holder (Product Code: SLE/CH/58) is a non-corrosive holder that keeps a funnel steady above a flask or beaker during filtration. Its outer ring takes funnels of 3 to 6 inch diameter, and a removable inner lid holds smaller funnels of 1 to 3 inch diameter, so one holder covers everything from a small analytical funnel to a large filling funnel. It is available as a Single Funnel Holder or a Double Funnel Holder for running two filtrations side by side. The holder is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India and to overseas institutions.

Specifications

Parameter	Detail
Type	Funnel holder
Construction	Non-corrosive
Outer ring	Holds funnels of 3 to 6 inch diameter
Inner lid	Removable; holds smaller funnels of 1 to 3 inch diameter
Versions	Single Funnel Holder; Double Funnel Holder

Typical Use

Gravity filtration is one of the first separation techniques students learn: a folded filter paper is placed in a funnel, the funnel is held above a conical flask or beaker, and the mixture is poured in so the solid stays on the paper and the clear filtrate collects below. Holding the funnel by hand is tiring and risks spills, so a holder frees both hands for pouring and rinsing. With the inner lid in place, small funnels sit securely for filtering a few millilitres in salt analysis; lift the lid out and the outer ring takes a larger funnel for filtering a whole reaction mixture or decanting a solution.

The double version is handy when comparing two filtrations, such as filtering the same mixture through different papers, or when two students share one bench position. Position the stem of the funnel so it touches the inside wall of the receiving vessel; this speeds filtration and prevents splashing. Because the holder is non-corrosive, it can simply be rinsed after contact with dilute acids or salt solutions and left to dry.

Manufacturer

ScienceLab is the trading name used by Jain Scientific Equipments Private Limited, an apparatus maker in Ambala, Haryana, that supplies schools, colleges and laboratories in India and international markets. Visit the company profile to learn more.
