Product Name :

Burette Clamps

Product Code :

SLE/CH/64

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Burette Clamps (Product Code: SLE/CH/64) hold a burette straight and steady on a stand rod throughout a titration. The clamp is die-pressed from thick M.S. sheet and chrome plated; each burette sits in a V-groove and is pressed in place by a spring-loaded jaw, and the bosshead takes rods up to 18 mm in diameter. Versions for a single or a double burette are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for any burette clamp India lab requirement and for international markets.

Specifications

Parameter	Detail
Type	Depressed burette clamp
Material	Thick M.S. (mild steel) sheet
Construction	Die-pressed symmetrically, non-breakable
Jaws	Two jaws with V-grooves; the burette rests in one and the other presses it by spring force
Finish	Well chrome plated
Bosshead	Accommodates rods up to 18 mm dia.
Versions	For single burette; for double burette

Typical Use

A burette that leans gives parallax errors at the meniscus and drips down the side of the flask, so a clamp that holds it truly vertical is basic to accurate acid-base, redox and complexometric titrations. The spring-loaded jaw lets a student slide the burette in or out for filling and rinsing without loosening a screw, while the V-grooves keep it aligned each time it is replaced.

The double version holds two burettes side by side — useful for back-titrations, for running a blank next to the sample, or for sharing one stand between two students. Mount the clamp high enough for a conical flask to swirl freely under the jet. Schools assembling a titration kit for school practicals in India typically pair this clamp with a stand, burette and flask for each bench.

Manufacturer

The clamp is produced by **Jain Scientific Equipments Private Limited**, trading as ScienceLab, an Ambala, Haryana manufacturer of titration hardware and laboratory apparatus for education and industry. Further information is on our company profile page.
