Product Name :

Micro Tip Box

Product Code :

SLE/CH/72

Description :

Micro Tip Box (Product Code: SLE/CH/72) is a racked, lidded box that holds micropipette tips upright so they can be picked up directly on the pipette shaft without being touched by hand. Two capacities are offered: one box takes 96 micro tips of 2-200 µl and the other takes 100 micro tips of 200-1000 µl. The box is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for biology, biotechnology and analytical labs that buy lab plastic ware and chemistry lab equipment in India, and for international markets.

Specifications

Parameter	Detail
Type	Box for micropipette tips
Capacity, small-volume tips	96 micro tips of 2-200 µl
Capacity, large-volume tips	100 micro tips of 200-1000 µl

Typical Use

Loose tips in a bag are easily contaminated and slow to fit. In a tip box each tip stands in its own hole, so the user presses the pipette straight down onto a tip and lifts it out without contact from gloves or fingers. Keep the lid closed between uses to keep dust out, and work across the boxrow by row so partly used boxes are easy to top up.

Match the box to the pipette on the bench: the 2-200 µl box for small-volume work such as reagent additions and ELISA loading, and the 200-1000 µl box for larger transfers and dilutions. Labs usually keep a filled box for each pipette and refill from bulk tips, so repeat orders to a lab consumables supplier in India stay simple and predictable.

Manufacturer

Jain Scientific Equipments Private Limited is the company behind the ScienceLab brand; from its base in Ambala, Haryana it produces laboratory plasticware, instruments and educational apparatus. The company profile gives an overview of its work.

Related Laboratory Equipment

Pipettes and tips that go with this box:

- Micropipette Tips — tips for filling and refilling the box
- Filtered Micropipette Tips — for work where aerosol carry-over must be avoided
- Micropipette — the instrument that picks tips from the box
- Micro Test Plates — the plates often loaded using these tips
