Description :

Red Litmus Paper (Product Code: SLE/CH/78) is an indicator test strip used to show whether a solution is alkaline in introductory acid–base lessons in school and college chemistry laboratories. The easy-to-use strips turn blue when dipped into an alkaline or basic solution and come 100 strips per vial, a staple among litmus paper for school labs in India. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, along with its chemistry lab equipment in India.

Specifications

Parameter	Detail
Type	Red litmus test strips
Indication	Turns blue in alkaline/basic solutions
Pack	100 strips per vial
Handling	Easy to use; no preparation needed
Suitable for	Introductory acid–base lessons and quick bench tests
Shelf life	Depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted
Product code	SLE/CH/78
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Red Litmus Paper Used For?

Red litmus answers one question: is this sample a base? Students touch a strip with a drop of the test liquid on a clean glass rod, and a blue patch confirms an alkaline solution such as soap water, lime water or a solution of baking soda. If the strip stays red, the sample is either acidic or neutral, which is why teachers pair it with blue litmus in an acid base indicator activity to sort samples into all three groups. Moistened red litmus held at the mouth of a test tube is also the classic check for alkaline gases such as ammonia.

Tear strips in half to make a vial last through more lab sessions, use a fresh piece for every sample, and keep the vial tightly closed and away from bottles of ammonia or other alkalis, because vapours in the air can turn unused strips blue. Handle strips with dry fingers or forceps so moisture does not spoil the rest of the vial.

Supplier

Red Litmus Paper is supplied by **Jain Scientific Equipments Private Limited**, which trades as ScienceLab from Ambala, Haryana, India. Indicator papers and other chemistry consumables are sourced for schools, colleges and distributors and can be quoted together with laboratory apparatus for India and international markets.
