Palm	Cow split suede with patch palm
Back and cuff	Striped cotton
Size	10
Colour	Grey and purple
Product code	SLE/G/02
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Riggers Glove Used For?

Rigger gloves take their name from rope and rigging work, and the design has become a general-purpose work glove. The split suede palm with its extra patch takes the wear when gripping timber, metal stock, crates or tools, while the cotton back lets the hand breathe. In vocational and engineering training workshops, students use them when carrying materials, setting up machines, handling rough castings or clearing a work area.

They are equally useful for lab technicians moving benches and cabinets, for stores staff unloading deliveries and for outdoor field work. Riggers are handling gloves, not specialist protection, so they are not a substitute for welding, chemical or electrical gloves. Keep them dry where possible, as suede stiffens after soaking. Institutions buying from a laboratory equipment supplier in India often add a few pairs for their maintenance teams.

What to Specify When Ordering

- Number of pairs required in size 10.
- Whether other hand sizes are needed (ask us what can be offered).
- Any specialist gloves, such as welding or chemical gloves, to quote alongside.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, based in Ambala, Haryana. It manufactures the Riggers Glove for technical institutes, colleges, laboratories and distributors that want work gloves and lab equipment from a single source. Company background is on
