Description :

Female Half Pelvis Model (Product Code: SLE/A/04) is an approximately life-size sectional model that lets students look straight into the female pelvis and see how the bladder, uterus and colon sit in relation to one another and to the lower spine. It is used in secondary and senior secondary biology, nursing, midwifery and paramedical classrooms whenever reproductive or pelvic anatomy is taught. As an anatomical models manufacturer, **Jain Scientific Equipments Pvt Ltd (ScienceLab)** of Ambala supplies it mounted on a blue base with a laminated key.

Specifications

Parameter	Detail
Scale	About life size
View	Cross section of a female pelvis
Organs in section	Bladder, uterus and colon
Skeletal and nervous structures	Structure of the spine and the spinal cord present in the pelvis
Base	Mounted on a blue base
Key	Laminated key included

Typical Use

Sectional models answer a question that flat textbook diagrams leave vague: what lies in front of, behind and above what. With this half pelvis, a teacher can show that the bladder sits at the front, the uterus behind it and the colon further back against the spine, then explain how a filling bladder or a growing uterus changes that arrangement. Nursing and midwifery tutors use the same view when discussing catheterisation, pelvic examination or the changes of pregnancy in general terms.

The laminated key survives repeated handling in practical rooms, so students can use it for self-testing without damaging a paper sheet. When building a biology lab equipment India classroom set for reproduction and excretion, many schools place this model next to a skeletal female pelvis so learners can compare the bony framework with the soft organs it protects.

Manufacturer

ScienceLab is the brand under which Jain Scientific Equipments Private Limited, based in Ambala, Haryana, makes anatomy and biology teaching models for schools, colleges and training institutes. Details of the company and its product range are on the ScienceLab profile page.

Related Human Models

Useful companions for a lesson on the pelvis and reproductive system:

- Female Pelvis with Organs — a further view of pelvic organs for side-by-side comparison.
- Female Skeletal Pelvis — the bony pelvis alone, for teaching landmarks and pelvic shape.
