Description :

Seamless Silicone Oven Glove (Product Code: SLE/G/07) is a heat-handling glove used to lift and move hot items such as trays, dishes and glassware in laboratories, food-science rooms and kitchens. Its raised silicone detailing gives a non-slip, sure grip, while generously sized cotton cuffs and centres keep it comfortable on the hand. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its lab safety and hand-protection range.

Key Details

Parameter	Detail
Type	Seamless oven glove with silicone detailing
Grip	Raised silicone detailing for a non-slip, sure grip
Cuff and centre	Generously sized cotton cuffs and centres
Intended use	Handling hot items with confidence
Product code	SLE/G/07
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Silicone Oven Glove Used For?

The silicone oven glove is worn whenever something hot has to be lifted by hand: taking trays out of a hot air oven or drying oven, moving a warm dish off a hot plate, or carrying heated containers in a home-science or food-technology room. The raised silicone pattern helps the hand hold smooth or slightly wet surfaces, which matters most when the item is glass or metal.

Keep the glove dry before use, because damp fabric passes heat much faster than dry fabric. Grip items with the whole hand rather than the fingertips, and switch to tongs for small crucibles or narrow-necked flasks. Look over the silicone detailing and cotton areas before each session and retire a glove that has worn thin.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab, supplies the Seamless Silicone Oven Glove from Ambala, Haryana, together with lab ovens, hot plates and other safety items. That lets a school or college source its heat-handling gear in the same order as the equipment it is used with. We serve institutions, dealers and importers in India and international markets; read more on the ScienceLab company profile.

Related Gloves & Face Masks

Items often ordered with the silicone oven glove for heat-handling work:

- Oven, 43 litre — a lab oven whose hot trays and glassware the glove helps you remove.
- Hot Plate General Purpose — moving heated vessels off a hot plate is another everyday job for the glove.
