Weight (box of 100)	1200 g
Volume (box of 100)	2200 cubic cm
Product code	SLE/G/13
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Examination Gloves Used For?

Doctors, nurses, lab technicians and students wear examination gloves for routine patient examinations, collecting and handling specimens, preparing slides and doing general bench work where a single-use hand covering is needed. The micro rough surface helps hold slides, tubes and small instruments, and the ambidextrous shape means any glove from the box fits either hand.

Because these gloves are non-sterile, they are not meant for procedures that call for sterile gloves. Change gloves between tasks, discard them after a single use, and keep boxes away from heat and direct sunlight. Anyone with a known latex allergy should use a latex-free glove instead.

What to Specify When Ordering

- Size mix: how many boxes of small, medium, large and extra-large
