Quality (as listed)	AQL 1.5
Sizes	Small, Medium, Large, Extra-Large
Packing	100 pieces per dispenser box; 10 dispenser boxes per master carton
Weight (box of 100)	1200 g
Volume (box of 100)	2200 cubic cm
Product code	SLE/G/20
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Powdered Exam Gloves Used For?

Powdered exam gloves are a staple for general examinations, specimen handling, cleaning instruments and routine tasks in clinics, wards, nursing schools and teaching labs. The powder helps the gloves slide on quickly, which suits busy settings where gloves are changed many times a day, and the ambidextrous shape means any glove from the box fits either hand.

Where powder residue could affect slides, samples or instruments, or where users prefer powder-free gloves, pick a powder-free glove instead. These gloves are non-sterile, so they are not for procedures that need sterile gloves, and anyone with a latex allergy should use a latex-free option.
