Description :

Vinyl Gloves (Product Code: SLE/G/21) are powder-free gloves made of vinyl, used in hospitals and also suited to clinics and laboratories for routine handling tasks. Being vinyl, they contain no natural rubber latex, which makes them an option where latex sensitivity is a concern, and the powder-free finish leaves no residue on hands or surfaces. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, with its range of lab consumables.

Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Vinyl Gloves Used For?

In hospitals, vinyl gloves are used for routine ward tasks, handling linen and non-hazardous materials, general cleaning and quick jobs where hands need a simple covering. Clinics, nursing schools and teaching labs use them in the same way for short, low-demand tasks at the bench or bedside.

Vinyl is less stretchy than latex or nitrile, so vinyl gloves usually fit more loosely; for long procedures or work that needs higher puncture resistance, nitrile gloves are the usual choice. Change gloves between tasks and discard used gloves. Their sterility is not stated, so do not use them where sterile gloves are required.

Supplier

Hospitals and clinics that buy lab and medical equipment from ScienceLab often add consumables such as these vinyl gloves to the same order. ScienceLab is the trading name of Jain Scientific Equipments Private Limited, Ambala, Haryana, which supplies them to healthcare buyers, laboratories and dealers in India and international markets. Visit our profile page to learn more about the company.

Related Gloves & Face Masks

Other gloves and hygiene items to consider with Vinyl Gloves:

- Powder Free Examination Gloves — nitrile gloves for more demanding handling.
- Examination Gloves — latex, micro rough gloves in sizes small to extra-large.
- Non Woven Face Mask — face covering for ward and lab routines.
