Product Name :

Human Sexless Torso Model

Product Code :

SLE/A/24

Science Lab
Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

A dissectible torso without reproductive organs that comes apart into 16 parts, so one model carries a class through the nervous, respiratory, circulatory, digestive and urinary systems. It shows a longitudinally sectioned half brain, an eyeball, both lungs, a 2-part heart, the main abdominal organs, a sectioned kidney with its ureter and the urinary bladder, with open dissections at the neck and thigh.

Sexless torso parts and dimensions

Parameter	Detail
Dissectible parts	16
Reproductive organs	Not included (sexless torso)
Open dissections	Neck and thigh
Head	Half brain, sectioned longitudinally; eyeball
Chest	Both lungs; 2-part heart; descending thoracic aorta and oesophagus
Abdomen	Stomach; pancreas and duodenum; liver; small and large intestines in one piece with removable caecum
Urinary structures	Half of one kidney, sectioned in the frontal plane; kidney with ureter and urinary bladder
Base	Reinforced polymer
Size	90 × 33 × 23 cm
Product code	SLE/A/24
Minimum order	10 units
Dispatch	Usually within 7 to 10 working days
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

Teaching body systems with the sexless torso

Chest layer by layer. Lift out both lungs to expose the heart, then open the 2-part heart and trace the aorta and oesophagus down behind it. A separate lungs with heart and larynx model or a larger human heart model can then be passed round for closer study of the chambers.

The digestive route. Remove the stomach, then the liver, then the pancreas and duodenum, and finally the intestines with the caecum. Students follow food from the oesophagus to the large intestine, then compare the torso stomach with a stomach on a stand that shows the wall in more detail.
