Product Name :

Human Regional Brain Model

Product Code :

SLE/A/30

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Regional Brain Model (Product Code: SLE/A/30) is a two-part brain colour coded to identify the primary functional areas of the cerebral cortex, used as a biology teaching aid to explain brain function in school, psychology and health-science classes. Cranial nerve origins are prominently identified, a numbered key is included, and the model stands upright in a contoured storage cradle. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Parts	Two-part brain
Size (without base)	16 x 13 x 12 cm
Colour coding	Primary functional areas within the cerebral cortex
Cranial nerves	Origins prominently identified
Key	Numbered key included
Display and storage	Stands upright in a contoured storage cradle
Product code	SLE/A/30
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Regional Brain Model Used For?

Where most brain models concentrate on shape and lobes, this one is built around function. Teachers use the colour-coded regions to show that different parts of the cortex are specialised, then ask students to predict what might change if one coloured area were injured. This functional approach suits psychology and neuroscience classes as well as school biology chapters on the nervous system, and it makes the model a strong addition to a human biology model set in India.

Turning the model over brings the prominently marked cranial nerve origins into view, linking cortical function to the nerves that leave the brain. The numbered key keeps identification exercises consistent between groups. After use, return the two halves to the contoured cradle, where the model stands upright and is protected on the shelf.

OEM Manufacturer

The Human Regional Brain Model is made by its original equipment manufacturer (OEM), Jain Scientific Equipments Private Limited, trading as **ScienceLab**, at the company's own licensed factory at Saha, Ambala, Haryana, India.

Universities, schools and distributors receive it factory-direct, and if the key or one half of the brain [illegible] for m[illegible]
