Product Name :

Adult Venipuncture and Injection Training Arm, Dark

Product Code :

SLE/A/39

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Adult Venipuncture and Injection Training Arm, Dark (Product Code: SLE/A/39) is a skills-lab arm for practising intravenous access and intramuscular injection before learners work with patients. It simulates starting simple IVs and placing over-the-needle IV catheters, with veins along the forearm and on the back of the hand, and a foam pad that stands in for muscle tissue for injection practice. The dark simulated skin helps trainees practise vein location on darker skin tones. Nursing schools, paramedical institutes and hospital training units buy it from **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a vocational training lab equipment manufacturer in India.

Specifications

Parameter	Detail
Type	Adult venipuncture and injection training arm
Dimensions	35 × 12 × 6 in
Skin	Simulated dark skin; the vein rolls as it is palpated
Needle feedback	Characteristic “pop” can be felt as the needle penetrates the vein
Vein access sites	Along the forearm and at the back of the hand
IV procedures simulated	Starting simple IVs and over-the-needle IV catheters
Injection practice	Intramuscular injection using a foam pad that simulates muscle tissue

Typical Use

In a nursing skills lab the arm is used for step-by-step practice of peripheral venous access: applying a tourniquet, palpating for a suitable vein, anchoring it against the rolling that happens in real patients, inserting the needle and recognising the “pop” that signals entry into the vein. Trainees then progress to over-the-needle catheters on the forearm and hand sites. The separate foam muscle pad allows intramuscular injection technique to be taught in the same session without switching trainers.

Instructors in paramedical and allied-health colleges often run timed stations with the arm for assessment, and it is a practical addition to lab equipment for college skills centres in India. Always follow your institution’s sharps-disposal procedure during practice, and rotate puncture sites between groups to spread wear across the simulated veins.

Manufacturer

The training arm is manufactured by **Jain Scientific Equipments Private Limited**, whose trading name is **ScienceLab**. From its base in Ambala, Haryana, the company provides training and laboratory equipment to nursing, medical and technical institutions in India and international mark
