Description :

Head Section with Larynx Model (Product Code: SLE/A/43) is an about life-size dissection of the head used to teach the upper airway, the swallowing passage and the larynx in anatomy, ENT, speech-therapy and nursing courses. It shows the salivary glands, pharyngeal musculature and laryngeal structures, and divides to give a midsagittal view of the oronasal cavity, pharynx, larynx and trachea. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM human anatomical models manufacturer in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Type	Dissectible head section model with larynx
Scale	About life size
Size (without base)	27 x 14 x 16 cm
Structures shown	Salivary glands, pharyngeal musculature and laryngeal structures
Sectional view	Divides to show a midsagittal view of the oronasal cavity, pharynx, larynx and trachea
Base	Durable polymer base; the model can be removed from the base for examination
Supplied with	Identification key
Product code	SLE/A/43
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Head Section with Larynx Model Used For?

In a lesson on swallowing and voice production, the teacher opens the model at its midsagittal division and traces the path of air from the nasal cavity through the pharynx into the larynx and trachea, then follows the route that food takes from the mouth into the pharynx. Because the pharyngeal muscles and the salivary glands appear on the same piece, students can connect chewing, saliva secretion and swallowing as one sequence instead of three separate topics.

Lifting the head off its base lets small groups pass it around during practicals and study the cut surface closely. For quick assessments, cover the identification key and ask learners to name the structures you point to. Institutions assembling biology teaching aids in India for ENT, speech-science or nursing introductions often pair it with a separate larynx model for extra detail of the voice box; senior school classes studying respiration and digestion can use it too.
