Description :

Economy Human Skull (Product Code: SLE/A/55) is an economy-range plastic reproduction of a life-size human skull, used for hands-on skull anatomy practice in schools, nursing colleges and paramedical institutes. It shows the skull's structural details, including joints, sutures, fissures, foramina and processes, and has a removable skull cap and an articulated, removable mandible. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of school biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Material	Plastic
Scale	Reproduction of a life-size human skull
Structural detail	Joints, sutures, fissures, foramina and processes
Skull cap	Removable, to show the internal structure of the skull
Mandible	Articulated and removable
Product code	SLE/A/55
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Economy Human Skull Used For?

Skull practicals run more smoothly when every group has a skull on its own bench rather than crowding round one demonstration model. For a school laboratory setup in India that needs several skulls, this economy model makes that possible. Groups trace the coronal, sagittal and lambdoid sutures, find foramina such as the foramen magnum and the mental foramen, and locate processes like the mastoid and styloid processes, then compare answers across benches.

With the skull cap lifted away, the class can look down into the cranial cavity and see the stepped floor on which the brain rests. The articulated mandible first shows how the jaw hinges against the skull; removing it then lets students study its body, ramus and condyle on their own. Keep a padded tray under the skull during practicals so parts are not dropped on hard benches.

OEM Manufacturer

The Economy Human Skull is produced by Jain Scientific Equipments Private Limited, trading as ScienceLab, which is the OEM (original equipment manufacturer) and makes it at its own licensed factory at Saha, Ambala, Haryana, India. As an anatomical models manufacturer selling direct, it gives schools, colleges, dealers and importers a factory-direct quotation, whether for a single skull or a full class set.

If a mandible or skull cap is damaged after heavy use, ask us about a replacement from the make
