Product Name :

Pathology of the Human Thyroid Model

Product Code :

SLE/A/60

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Pathology of the Human Thyroid Model (Product Code: SLE/A/60) sets two thyroid glands side by side so that learners can compare a gland affected by autoimmune disease with one carrying tumour changes next to healthy tissue. It is designed for pathology, physiology and nursing lessons in which students must recognise how common thyroid disorders alter the organ. The model is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, within its rangeof human anatomical models for schools, colleges and medical training institutes.

Specifications

Parameter	Detail
Model type	Thyroid pathology teaching model
Contents	2 thyroid models, divided 4 ways
First thyroid	Illustrates Graves' autoimmune disease
Second thyroid	Shows thyroid adenoma and carcinoma, compared with the normal right side of the thyroid
Mounting	On stand with base
Size	33 x 23 x 25 cm

Typical Use

A pathology tutor can open the lesson with the normal right side of the second gland, move across to the adenoma and carcinoma on the same piece, and finish with the Graves' specimen. Working from healthy to diseased tissue in this order lets students put the differences they observe into their own words, which is useful for viva preparation, practical records and case-based discussion.

The model also serves nursing and allied-health classes that cover thyroid swelling and hormone disorders, and it can stay on the demonstration bench as a reference throughout an endocrine unit. As a biology teaching aid it works well after students have located the thyroid on a general endocrine or neck model, because they then know where the gland sits before studying what goes wrong with it. Keep the model on its base while it is being examined and wipe it with a soft, dry cloth after the session.

Manufacturer

This thyroid pathology model comes from Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades under the ScienceLab name and produces anatomical and laboratory teaching equipment for institutions in India and international markets. Background on the business is available on the company profile page.
