Description :

Pyrex Beaker, Low Form (Product Code: SLE/GB/03) is a Griffin-pattern low-form beaker in low-expansion Pyrex glass, offered from a compact 30 ml size up to 4000 ml. It can be heated directly in an open flame, and its single metric scale in white enamel plus an extra-large marking spot make it a routine vessel for mixing, heating and cooling in professional, college and school laboratories. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, within its chemistry lab glassware range for India and international markets.

Specifications

Parameter	Detail
Form	Low form (Griffin type)
Material	Pyrex glass, low expansion
Capacities	30 ml, 50 ml, 100 ml, 150 ml, 250 ml, 400 ml, 600 ml, 1000 ml, 2000ml, 3000 ml, 4000 ml
Heating	Heat resistant; can be heated directly in an open flame
Chemical resistance	Chemical resistant
Scale	Single graduated metric scale with white enamel graduations (approximate, not intended for accurate liquid measurement)
Labelling	Extra-large marking spot
Suitable for	General laboratory mixing, heating and cooling

Typical Use

With eleven capacities to choose from, a lab can match the beaker to the job: the 30 ml and 50 ml sizes for small reagent portions or indicator solutions, the middle sizes for dissolving, neutralising and warming samples, and the 2000 ml to 4000 ml beakers for making up larger batches of solution or holding a cooling bath. The low, wide shape sits steadily on a gauze, hot plate or bench and leaves room to stir.

The extra-large marking spot takes pencil or marker, so several beakers of similar-looking solutions on one bench are not confused — handy during titration preparation or salt analysis sessions in chemistry lab equipment setups for schools in India. Because the enamel graduations are approximate, measure volumes in a cylinder or pipette first and use the beaker scale only as a quick visual check.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies this Pyrex low-form beaker together with the laboratory apparatus it manufactures, so institutions can combine glassware and equipment in a single enquiry. Company background is on our profile page.
