Description :

Pitcher, Polypropylene, 2000 ml (Product Code: SLE/GB/08) is the large member of our lab pitcher range: a two-litre polypropylene vessel shaped like a beaker, with a sturdy handle, a large pouring spout and graduations every 50 ml from 50 to 2000 ml. At roughly 17 cm tall and 14 cm across it carries enough liquid to fill several wash bottles or a small water bath in one trip, and it tolerates hot liquids provided it never meets an open flame. Manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school laboratory equipment supplier in India, it suits chemistry prep rooms, biology labs and technical institutes looking for practical lab equipment for college use.

Specifications

Parameter	Detail
Capacity	2000 ml
Material	Polypropylene
Graduations	50 ml intervals, 50 ml to 2000 ml
Approximate height	17 cm
Approximate diameter	14 cm
Pouring features	Sturdy handle and larger spout
Chemical resistance	Chemical resistant
Temperature use	Suitable for hot liquids; keep away from open flame

Typical Use

The two-litre size is built for volume jobs: carrying distilled water from a still or carboy to the benches, making up a large batch of dilute solution that will later be divided among groups, filling aspirator bottles, or collecting used rinse water so it can be disposed of properly rather than poured at each bench. Technicians preparing media, buffers or cleaning solutions for a full class find one large pitcher quicker than several trips with small beakers.

A full pitcher is heavy, so hold it by the handle and steady the base with the other hand when pouring into a funnel. The 50 ml marks are meant for convenient dispensing; for solutions that need an exact concentration, measure the components in a cylinder or volumetric flask.

Manufacturer

Production of this pitcher is handled by Jain Scientific Equipments Private Limited, which operates in Ambala, Haryana under the ScienceLab name and ships labware across India and to international markets. See the company profile for more.
