Description :

Horizontally Sectioned Human Head Model (Product Code: SLE/A/71) is a life-size human head sliced horizontally into 12 sections, used for hands-on sectional anatomy in neuroanatomy, nursing and allied-health classes. Each section can be rotated or removed, and the numbered structures on the slices include muscles, nerves and the gyri and sulci of the brain. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM scientific lab equipment manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Horizontally sliced human head model
Scale	Life size
Number of sections	12 horizontal sections
Handling	Sections can be rotated or removed for closer observation
Labelled structures	Numbered muscles, nerves, and brain gyri and sulci
Product code	SLE/A/71
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 12-Section Human Head Model Used For?

The value of this model is in the handling. A student can swing one slice aside or lift it out entirely, turn it over in the hand and compare its upper and lower faces with the slices next to it. Tracing a numbered nerve or muscle across several consecutive sections shows how a structure runs through the head, something a single flat diagram cannot do. On the brain surfaces, the numbered gyri and sulci give a concrete way to practise naming the folds of the cortex.

In practical examinations, examiners often remove one or two sections and ask candidates to name the numbered points or place the slice at the correct level. Returning each piece to its position after the session keeps the set complete. For a department buying biology teaching aids in India, a model like this supports small-group work where several students examine different sections at the same time.

OEM Manufacturer

Jain Scientific Equipments Private Limited operates the **ScienceLab** brand and is the OEM (original equipment manufacturer) of this 12-section head. The model is made at the company's own licensed factory at Saha, Ambala, Haryana, India, not sourced from a trading house, and goes factory-direct to colleges, dealers and importers.

Because the slices are separate pieces, ask us if one is lost; replacement questions and repeat order
