Product Name :

Human Endocrine Organs Model

Product Code :

SLE/A/74

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Endocrine Organs Model (Product Code: SLE/A/74) brings the main hormone-producing glands together on a single plaque at about life size. Individual representations of the pituitary, adrenal, thyroid and parathyroid glands appear alongside a testis and a dissected ovary with its fallopian tubes and associated structures, and a key is supplied. Because it is plaque-mounted, it can hang on a wall or stand on a bench, giving biology, physiology and nursing classrooms a permanent endocrine reference. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Format	Plaque mount
Scale	About life size
Glands shown	Pituitary, adrenal, thyroid and parathyroid glands
Gonads shown	A testis, and a dissected ovary with fallopian tubes and associated structures
Key	Included
Size	53 x 38 cm

Typical Use

Endocrinology is often taught gland by gland, which makes it hard for students to keep the whole system in view. With the glands displayed side by side, a teacher can introduce each one, name the hormones it releases and explain the feedback links between them, for example how the pituitary controls the thyroid, adrenal glands and gonads. Because the organs are shown at about life size, students also get a realistic sense of how small some of these glands are.

Mounted on a classroom wall, the plaque works like a three-dimensional alternative to a biology chart set, so it can stay on display for revision throughout the term. It is useful in nursing and pharmacy courses covering diabetes, thyroid disorders and hormone therapy, and in senior school biology units on control and coordination. Dust the surface with a soft brush or cloth; avoid hanging it in direct sunlight.

Manufacturer

Jain Scientific Equipments Private Limited produces the endocrine plaque under its ScienceLab trading name in Ambala, Haryana, as one of many models for schools, nursing colleges and medical institutes. Company details are available on the company profile page.
