Description :

Burettes with detachable Stopcocks Schellbach Stripe (Product Code: SLE/GBu/08) bring together two practical features in one graduated burette: a Schellbach stripe for accurate meniscus reading and a PTFE key stopcock that can be removed for cleaning. The body is high-quality, heavy-duty borosilicate glass. This combination suits shared teaching laboratories where readings need to be reliable and the glassware must also be easy for technicians to service. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory glassware manufacturer serving India and international markets.

Specifications

Parameter	Detail
Scale feature	Schellbach stripe for accurate meniscus reading
Stopcock	Detachable, with PTFE key
Construction	High-quality, heavy-duty borosilicate glass
Sizes	5 ml, 10 ml, 25 ml, 50 ml, 100 ml
Marking	Graduated
Heat and chemical resistance	Yes, both
Intended for	Chemical laboratory use

Typical Use

During a practical, the stripe helps every student read the level the same way: the stripe appears to narrow to a point at the meniscus, and that point is taken as the reading. After the class, the stopcock is detached so the barrel can be brushed through end to end and the key rinsed on its own, which keeps the bore free of dried reagent and the stripe clearly visible for the next group.

When planning a school laboratory setup in India or elsewhere, departments often standardise on one burette pattern for all benches. This model is a sensible choice where both reading consistency and ease of maintenance are priorities. Check each reassembled burette with water for leaks before use, and store it with the stopcock removed or loosened.

Manufacturer

The manufacturer is **Jain Scientific Equipments Private Limited**, better known by its trading name **ScienceLab**. From Ambala in Haryana, the company supplies glassware, instruments and teaching aids to laboratories in India and abroad. Learn more on our company profile.
