Product Name :

Human Male and Female Torso Model, 20 Parts

Product Code :

SLE/A/79

Description :

Human Male and Female Torso Model, 20 Parts (Product Code: SLE/A/79) is a life-size anatomical torso that includes the head and lets a teacher switch between male and female reproductive anatomy on the same figure. Its 20 separable parts allow students to take the model apart, study each region and rebuild it, which makes it a practical centrepiece for human anatomical models in school biology rooms, nursing schools and medical colleges. The model is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Scale	Life size
Size	40 x 26 x 92 cm
Number of parts	20
Region shown	Torso and head, depicted in detail
Interchangeable genitalia	Female (2-part) and male (4-part)
Identification key	Identifies more than 180 significant structures
Presentation	Museum-quality anatomical model

Typical Use

Teachers use this torso to show where the major organs of the head, chest and abdomen sit and how they relate to one another, then remove parts one at a time so the class can see what lies beneath. Because the genital inserts are interchangeable, a single model covers both male and female reproductive anatomy — useful for senior secondary biology, nursing foundation courses and first-year anatomy practicals where space for two separate torsos is limited.

The key naming more than 180 structures turns the model into a self-study station: students can be given a list of numbers to identify and check against the key. When dismantling, lay the parts out in order on a padded tray so they go back in the right sequence. As part of school biology lab equipment in India, a full-size torso like this is usually shared across sections, so store it covered to keep dust off the detail.

Manufacturer

This torso is produced by **Jain Scientific Equipments Private Limited**, a company in Ambala, Haryana that trades under the brand name **ScienceLab** and makes anatomy teaching models alongside a wider range of laboratory equipment. You can learn more about the business on our company profile page.
