Description :

Conical Flask, Pyrex (Product Code: SLE/GFL/02) is a narrow-neck, graduated conical flask in Pyrex glass, heat resistant and chemical resistant, for general chemistry work. It is available in eight sizes from 25 ml to 2000 ml, including a 125 ml size that sits between the usual 100 ml and 250 ml flasks. Schools, colleges and analytical laboratories that specify Pyrex glassware chooseit for titrations, solution preparation and heating. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab glassware supplier in India and international markets.

Specifications

Parameter	Detail
Material	Pyrex glass
Neck	Narrow
Capacities	25 ml, 50 ml, 100 ml, 125 ml, 250 ml, 500 ml, 1000 ml, 2000 ml
Scale	Graduated
Resistance	Heat resistant; chemical resistant
Used in	Chemical laboratory

Typical Use

The narrow neck keeps splashing and evaporation down while the flask is swirled, and it accepts a stopper or cotton plug when the contents need to be covered. That makes this flask a good receiving vessel for titrations, a container for dissolving and mixing reagents, and a vessel for gentle heating on a tripod and gauze. The 125 ml size is a convenient middle option for student titrations where 100 ml feels cramped and 250 ml is more than needed.

Treat the printed graduations as a guide rather than a measurement, heat the flask gradually, and let it cool naturally before washing. For departments standardising on a single glass type across their chemistry lab glassware in India, this Pyrex flask can sit alongside the Pyrex beakers in our range.

Supplier

This flask is supplied by **Jain Scientific Equipments Private Limited**, which trades as **ScienceLab** and is based in Ambala, Haryana, India. Alongside the glassware and apparatus it makes, the company sources items such as this one so that laboratories can order a complete list from one place. Background on the business is on our company profile.
