Description :

Human Oral Hygiene Model (Product Code: SLE/A/92) is a 3x life size set of teeth mounted ona base and supplied with a giant toothbrush, built for one clear purpose: teaching the correct wayto brush teeth. The enlarged scale lets a presenter show brush angle, stroke direction and hard-to-reach surfaces so that a whole room of children or adults can follow along. It is widely useful in primary schools, dental and nursing colleges, community health programmes and clinic waiting areas, and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Scale	3x life size
Mounting	Mounted on base
Included accessory	Giant toothbrush
Purpose	Teaching the correct way to brush teeth

Typical Use

Good brushing habits are easier to demonstrate than to describe. Using the giant toothbrush on the enlarged teeth, a teacher or dental hygienist can show how to hold the brush at an angle to the gumline, how to cover the outer, inner and chewing surfaces, and why the back teeth need special attention. Children can then take turns with the brush themselves, which turns a health talk into an active lesson they are more likely to remember.

The model is a natural fit for health education in schools across India, school dental camps and oral health awareness days. In dental hygiene and nursing training it is used to rehearse patient instruction, and in clinics it gives staff a quick visual aid when advising parents on their children's brushing routine.

Manufacturer

This model is manufactured by **Jain Scientific Equipments Private Limited**, whose products carry the **ScienceLab** brand. The company is headquartered in Ambala, Haryana, and supplies teaching models and lab equipment to schools and training institutions. More information is on our company profile.

Related Human Models

Teaching aids that complement an oral health or dental anatomy session:

- Dental Caries Model — shows what tooth decay looks like and why brushing matters
- Human Teeth (Denture) — for naming the different teeth before the brushing demonstration
- Human Teeth — an additional teeth model for group work
- Human Tongue Model — extends the lesson to the tongue and the rest of the mouth
- Mini Science Kit – Teeth and Eating — a hands-on activity kit for younger pupils
