Product Name :

Human Digestive Tract Model

Product Code :

SLE/A/99

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Digestive Tract Model (Product Code: SLE/A/99) presents the human digestive tract at life size on a single base, with a stomach that can be opened and a design that dissects into 3 pieces. It gives biology classes, nursing students and nutrition trainers a full-scale reference for how food travels through the body. The model is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a biology lab equipment supplier in India serving schools, colleges and training institutes.

Specifications

Parameter	Detail
Type	Model of the human digestive tract
Scale	Life size
Dissection	Dissectible into 3 pieces
Stomach	Can be opened to view the interior
Size	32 × 12 × 91 cm
Mounting	On base

Typical Use

In a digestion lesson the teacher can start at the top of the model and move downward, naming each stage of the journey and explaining what happens to food there. Opening the stomach turns an abstract idea into something visible: students can discuss how the stomach stores and churns food and why its lining matters, then close it again and continue along the tract. Because the model is life size, learners come away with a realistic sense of how long the digestive route is.

The model suits nutrition and digestion chapters in senior school, introductory anatomy for nursing and allied-health courses, and community health talks. It is a staple of high school biology lab equipment for this reason. With a longest dimension of 91 cm, it needs a stable table or a dedicated display space; move it by the base rather than by the organs, and keep the 3 pieces together between classes.

Manufacturer

ScienceLab is the brand name of **Jain Scientific Equipments Private Limited**, which manufactures this digestive tract model and runs its business from Ambala in the state of Haryana. The company equips laboratories in India and international markets; the company profile gives an overview of its work.
