Description :

Human Skull with Facial Muscles (Product Code: SLE/A/123) is a life-size plastic skull model used to teach the muscles of facial expression and mastication in anatomy, dental and physiotherapy classrooms. Its facial and masticatory muscles are colour-differentiated, the masseter is removable, the left side is painted with muscle origins (red) and insertions (blue), and a moveable jaw on the right demonstrates chewing. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Skull with facial and masticatory muscles
Scale and material	Life-size plastic replica
Size	18 × 18 × 25 cm
Weight	1.1 kg
Muscles	Facial and masticatory muscles differentiated by colour; masseter muscle removable
Skull cap	Occipitofrontalis and temporalis can be reflected to allow removalof the skull cap
Left side	Painted points of muscle origin (red) and insertion (blue)
Right side	Moveable jaw and flexible muscles to demonstrate the basic chewing motion
Product code	SLE/A/123
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Skull with Facial Muscles Used For?

Learning a muscle means knowing where it starts, where it ends and what it does when it contracts. This skull covers all three: the red and blue painted points on the left side show origin and insertion, while the flexible muscles and moveable jaw on the right let a student open and close the mouth and watch the chewing muscles respond. Removing the masseter exposes the deeper structures beneath it, a common step in dental anatomy practicals.

Reflecting the occipitofrontalis and temporalis and lifting off the skull cap takes the class from the muscles to the cranial cavity in one demonstration. Colour differentiation between the facial and masticatory groups helps beauty-therapy and physiotherapy learners separate expression muscles from jaw muscles. Among biology lab equipment in India it is a compact choice, at 1.1 kg, that is easy to pass around a class.

OEM Manufacturer

Jain Scientific Equipments Pvt Ltd (ScienceLab) is an OEM manufacturer of biology lab equipment in India, based in Ambala, Haryana,
