Product Name :

Anatomy of the Human Neck Model

Product Code :

SLE/A/124

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Anatomy of the Human Neck Model (Product Code: SLE/A/124) is a life-size ventral dissection of the human neck that gives clear views of its muscles, vascular structures, nerves and glands, with a printed key identifying 47 anatomical features. Anatomy departments, dental and nursing colleges and paramedical training centres use it to teach one of the most crowded regions of the body. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, a laboratory equipment manufacturer in India based in Ambala.

Specifications

Parameter	Detail
Type	Ventral dissection model of the human neck
Scale	Life size
Size (without base)	23 x 14 x 32 cm
Mounting	Durable polymer base
Structures shown	Muscles, vascular structures, nerves and glands
Key	Printed key identifying 47 anatomical features

Typical Use

In a short stretch of the body the neck carries blood to and from the head, air to the lungs, food to the stomach and nerve signals in both directions, all wrapped in layers of muscle and alongside important glands. Viewed from the front, this dissection lets a lecturer work through those layers in order, using the printed key to name each of the 47 features and to explain how the vessels, nerves and glands lie in relation to the neck muscles.

The model supports head-and-neck anatomy courses and clinical skills teaching, where students need to picture what lies beneath the skin before learning procedures or examinations in this area. It is a long-lasting addition to biology teaching aids for colleges because the key allows independent revision: students can cover the key, name the numbered features themselves and then check their answers.

Manufacturer

The Anatomy of the Human Neck Model is manufactured by **Jain Scientific Equipments Private Limited**, known to customers as **ScienceLab**. From Ambala in Haryana, the company provides anatomical models and laboratory equipment to educational and training institutions in India and international markets. Read more on the company profile.
