Description :

Fetal Skull (Product Code: SLE/A/126) is a fetal skull model used to teach fontanelles, sutures and the moulding of a baby's head during birth in midwifery, nursing and obstetrics training. It has a moveable spring-held jaw and is rod-mounted on a durable polymer base, from which the skull detaches for examination; without the stand it measures 11 × 11 × 20 cm. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Model	Fetal skull
Jaw	Moveable, spring-held
Mounting	Rod-mounted on a durable polymer base
Stand	Skull detaches from the stand for examination
Size (without stand)	11 × 11 × 20 cm
Product code	SLE/A/126
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Fetal Skull Model Used For?

At birth the bones of a baby's skull have not yet fused. The soft gaps between them, the fontanelles, and the sutures that join them are the landmarks a midwife feels for during examination to judge how the head is lying in the birth canal. With this model, students learn to find the diamond-shaped anterior fontanelle and the smaller triangular posterior fontanelle, and to trace the sagittal, coronal and lambdoid sutures that connect them.

Lifting the skull off its rod lets each learner hold it the way it would be felt during a delivery, while the tutor explains how unfused bones allow the head to mould and pass through the pelvis. Placed beside an adult skull, it also shows how large the cranium is compared with the face at this stage of life. Return it to the polymer base after the session so it stays on display and ready for the next group. As one of the human anatomical models made in India for maternal-health teaching, it is a core item for midwifery skills labs.

OEM Manufacturer

Jain Scientific Equipments Private Limited operates under the ScienceLab name and is the OEM (original equipment manufacturer) of this fetal skull, which it makes at its own licensed factory in Saha, Ambala, Haryana, India. Nursing schools, midwifery programmes, medical colleges, dealers and importers receive it directly from the maker.
