Product Name :

Anthropology Cranium Set

Product Code :

SLE/A/129

Description :

Anthropology Cranium Set (Product Code: SLE/A/129) is a set of 5 cast Hydrostone replicas of early hominid-type crania used to teach human evolution in anthropology, biology and archaeology courses. It covers Australopithecus afarensis, Australopithecus africanus, Homo habilis, Homo erectus and Homo neanderthalensis, so students can compare the crania side by side. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of biology lab equipment in India, at its own factory in Ambala.

Key Details

Parameter	Detail
Contents	5 cranium replicas of well-known early hominid-type species
Crania in the set	Australopithecus afarensis; Australopithecus africanus; Homo habilis; Homo erectus; Homo neanderthalensis
Material	Hydrostone
Production	Cast replicas
Product code	SLE/A/129
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Anthropology Cranium Set Used For?

Placed in the order in which the species appear in the fossil record, the five crania let students see the broad trends of human evolution for themselves. The braincase becomes larger and more rounded, the face projects less, and the jaws and teeth become smaller, while the heavy brow ridge of the Neanderthal cranium invites discussion of how closely related species differed. Students can also compare the position of the opening at the skull base where the spinal cord passes, a clue to upright walking.

A good practical asks groups to describe each cranium in their own words, then set it beside a modern human skull and list the differences. Homo habilis leads naturally into early stone-tool use, and Homo erectus into how early humans spread across continents. Hydrostone is a hard gypsum-based casting material, so handle the crania over a padded surface, keep them dry and dust them with a soft brush. For departments comparing human anatomical model manufacturers in India, the set adds evolutionary depth to a skull collection.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known to customers as ScienceLab, is the OEM (original equipment manufacturer) of the Anthropology Cranium Set and produces it at its own factory in Saha, Ambala, Haryana, India. Universities, schools, museums, dealers and importers order the set factory-direct, with no trading intermediary.
