Description :

Enlarged Human Cerebellum Model (Product Code: SLE/A/131) magnifies the human cerebellum to 4x life size and is dissected to show details of its internal organization. It separates into 2 parts and comes with a numbered key, giving neuroanatomy lecturers a large, clear model for teaching the part of the brain that coordinates movement and balance. As school and college biology lab equipment in India, it suits advanced biology, psychology and health-science courses. It comes from the anatomical models manufacturer **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Enlarged, dissected model of the human cerebellum
Scale	4x life size
Size	40 x 19 x 18 cm
Dissection	Dissectible into 2 parts
Internaldetail	Dissected to show details of internal organization
Key	Numbered key included
Mounting	Not on base

Typical Use

At life size the cerebellum is small and tucked beneath the back of the brain, so its structure is easy to overlook. Enlarged four times, it becomes a centrepiece for lessons on how the brain controls posture, balance and smooth, coordinated movement. Separating the 2 parts exposes the internal organization, and the numbered key lets students name what they see while the teacher explains how grey and white matter are arranged inside.

Physiotherapy and sports-science courses use it when discussing balance disorders and motor learning, psychology and neuroscience students use it in brain-structure modules, and senior biology classes use it to go beyond a whole-brain overview. It works well as part of a college biology lab setup alongside a brain stem model. Since it is not supplied on a base, rest it on a flat, padded surface during lessons and handle it with both hands.

Manufacturer

This cerebellum model is made by **Jain Scientific Equipments Private Limited**, an Ambala, Haryana manufacturer whose products are sold under the **ScienceLab** brand to education buyers in India and international markets. The company profile explains more about the business.
