Product Name :

Human Male and Female Urogenital Systems Model

Product Code :

SLE/A/135

Description :

The **Human Male and Female Urogenital Systems Model** (Product Code: SLE/A/135) places a male pelvis, a female pelvis and a generalized urinary system side by side on one plaque, so students can compare how the urinary and reproductive tracts are arranged in each sex. It is designed for school biology lab equipment in India as well as nursing, paramedical and pre-medical anatomy teaching, and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Scale	About 3/4× life size
Overall size	53 × 38 × 3 cm
Format	3-part plaque mount
Base	Durable polymer base
Pelvic sections	Detailed sagittal sections of the male and female pelvis, highlighting the major urogenital structures of each
Urinary system	Renal artery and vein, kidneys (right side showing interior anatomy), ureters, and urinary bladder with urethra

Typical Use

Teachers usually begin with the generalized urinary system, following blood into the kidney through the renal artery, looking at the opened right kidney, and tracing urine down the ureters to the bladder and urethra. The two sagittal pelvic sections then show where the bladder sits relative to the reproductive organs in men and women, which makes differences such as urethral length and the position of the uterus or prostate easy to point out.

Because everything is on one flat plaque, the model is convenient to prop up at the front of a class or to lay on a table for small-group revision, and it stores flat in a cupboard. It is a useful addition to any human body model kit used for reproduction, excretion and health-education topics.

Manufacturer

Manufacture is by **Jain Scientific Equipments Private Limited**, better known to schools and colleges by its trading name **ScienceLab**, and based in Ambala in the state of Haryana. You can find out more about the company on its company profile.
