Description :

Enlarged Human Brain Stem Model (Product Code: SLE/A/137) is a 3x life-size, one-piece model of the brain stem used to teach its neurological tracts and the exiting cranial and peripheral nerves in neuroanatomy, physiotherapy, speech-language and medical courses. Measuring 26 x 17 x 13 cm, it is not on a base and comes with a numbered key to its principal structures. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Type	Enlarged brain stem model
Scale	Enlarged 3x life size
Size	26 x 17 x 13 cm
Construction	One piece, not on a base
Detail shown	All the neurological tracts, plus exiting cranial and peripheral nerves
Labelling	Principal anatomical structures numbered; numbered key included
Product code	SLE/A/137
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Enlarged Brain Stem Model Used For?

At natural size the brain stem is small and crowded, which is why cranial nerve lessons are often confusing. Enlarging it three times gives room to see each nerve leaving the stem and to follow the tracts that carry motor and sensory signals. A lecturer can hold the model up to the class, name each numbered nerve in order and link it to a quick clinical test, such as asking students to follow a finger with their eyes or to shrug their shoulders.

Being one piece without a base, it is easy to hand around a tutorial group or rest on a table at any angle. Students revising for examinations can use the numbered key to quiz themselves on the tracts and nerve exits. Colleges building a human biology model set in India often place it next to a whole-brain model to show where the stem sits before studying it enlarged.

OEM Manufacturer

ScienceLab, the brand of Jain Scientific Equipments Private Limited, is the OEM (original equipment manufacturer) of the Enlarged Human Brain Stem Model and produces it at the company's own licensed factory at Saha, Ambala, Haryana, India.

Supplying medical and allied-health colleges, dealers and importers straight from the factory mean aker itself
