Description :

Micro Slide Viewer (Product Code: SLE/M/89) is a compact 50x optical viewer used to show students magnified specimens without setting up a full microscope, in primary, middle-school and outreach science lessons. It needs no power at all and is very lightweight, so it can be passed around a classroom or taken outdoors, while still giving students a quality image. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory instruments supplier in India, as a simple entry point to microscopy for schools.

Key Details

Parameter	Detail
Magnification	50x
Power requirement	None
Weight	Very light
Image	Quality image for student viewing
Value	Cost-effective option for class sets
Product code	SLE/M/89
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Micro Slide Viewer Used For?

Younger learners often struggle with the focusing knobs, lamps and slides of a compound microscope. A slide viewer removes those hurdles: the child simply looks through it and sees the specimen enlarged 50 times, which is enough to show plant cells, tissue patterns and small organisms. Teachers use it for observation stations, science clubs, museum and outreach visits, and revision lessons where a whole class needs to see the same specimen quickly.

Because there is no power supply, the viewer relies on daylight or room light, so point it towards a bright window or lamp for the clearest picture. There are no bulbs, cables or batteries to fail, which makes it dependable in classrooms without sockets and on field trips. It works well as the first step of a microscopy starter kit for school before students move on to a compound microscope.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies the Micro Slide Viewer to schools, science centres and educational distributors. We source it as part of our microscopy range, so viewers, magnifiers, microscopes and prepared slides can be ordered together. More about us is on the ScienceLab profile.
