Description :

Transparent Plastic Laboratory Apron (Product Code: SLE/SLC/09) is a clear, heavyweight plastic apron used to protect clothing and lab coats from chemical spills in school, college and industrial laboratories. Its 6 gauge plastic resists most chemicals, and the transparent sheetkeeps uniforms, name badges and coats visible underneath. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for buyers looking for a lab apron for school labs across India.

Specifications

Parameter	Detail
Material	Transparent plastic
Gauge	Heavyweight, 6 gauge
Chemical resistance	Resists most chemicals
Product code	SLE/SLC/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Transparent Lab Apron Used For?

An apron adds a wipe-clean layer over the front of the body, where most bench spills land — during titrations, preparing solutions, pouring reagents and washing glassware. Worn over a lab coat, the Transparent Plastic Laboratory Apron stops liquids soaking into the coat fabric.

Because it resists most chemicals rather than all, check compatibility before using it with strong solvents or concentrated acids, and choose a rubberized apron for heavy acid work. Wipe it down after each session and hang it away from burners and hot plates. It fits naturally alongside goggles and gloves in a list of chemistry lab equipment for schools in India.

Supplier

This apron is supplied by Jain Scientific Equipments Private Limited, known to customers as ScienceLab, from Ambala, Haryana. We source it for our Safety Lab Coat range and deliver to schools, colleges, industrial and testing laboratories, and dealers in India and international markets. Visit the ScienceLab profile for more about the company.

Related Safety Lab Coat Products

Compare other aprons or add the protective items used at the same bench:
