Description :

Black Rubberized Laboratory Aprons (Product Code: SLE/SLC/10) are black, rubber-coated aprons used to protect clothing from acids and other fluids in chemistry laboratories, preparation rooms and workshops. They come in three sizes — Small 27 x 36 inches, Medium 27 x 42 inches and Large 36 x 46 inches — so students, technicians and staff can each get a suitable fit. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for chemistry lab equipment buyers in India and abroad.

Specifications

Parameter	Detail
Finish	Black, rubberized
Protection	Protects clothing from acids and fluids
Small	27 x 36 inches
Medium	27 x 42 inches
Large	36 x 46 inches
Product code	SLE/SLC/10
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Rubberized Lab Aprons Used For?

Rubberized aprons are the heavier choice for acid work — diluting acids, filling and emptying cleaning baths, and washing acid-contaminated glassware — where a fabric coat on its own would soak through. The rubber surface sheds liquid, so splashes run off instead of reaching clothing.

The Small size is the usual pick for students working at a bench, the Medium adds length for most adults, and the Large gives wider cover for staff handling bulk liquids in preparation rooms. Schools buying from a school lab equipment supplier in India often keep a few of each size so every user is covered.

What to Specify When Ordering

- The number of Small (27 x 36 inches), Medium (27 x 42 inches) and Large (36 x 46 inches) aprons
- Who will wear them — students, technicians or staff — so the size split matches your users
- Whether chemical-resistant gloves and goggles are needed for the same people
- Your delivery location in India or abroad

Supplier

Jain Scientific Equipments Private Limited operates as ScienceLab in Ambala, Haryana, and supplies these rubberized aprons to schools, colleges, industrial laboratories, workshops and deale bat range page
