Product Name :

Crocodile Clips & Leads

Product Code :

SLE/PHY/67

Description :

Crocodile Clips & Leads (Product Code: SLE/PHY/67) are connecting leads with a crocodile clip at each end, used to make quick, temporary connections to component legs, bare wires, electrodes and terminals in school electricity experiments. They come as a pack of 20 leads,each 460 mm long — enough to equip several bench groups for an electricity experiment kit inschool. They are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEMmanufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Pack size	20 leads
Lead length	460 mm
Terminations	Crocodile clip at each end
Product code	SLE/PHY/67
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Crocodile Clip Leads Used For?

Crocodile leads connect things that have no socket. Students clip them onto the metal strips of an electrolysis cell, the legs of a resistor, the zinc and copper plates of a fruit cell or a test sample in a conductor-and-insulator experiment, then join the other end to a bulb holder, meter or cell. Because both ends are clips, the same lead works anywhere in the circuit.

For a firm contact, clip onto bare, clean metal rather than insulation, and avoid prising the jaws too wide. After the lesson, count the pack back in and store the leads loosely coiled so the cables and clip joints are not strained.

OEM Manufacturer

Jain Scientific Equipments Private Limited, the company behind the ScienceLab name, is the OEM (original equipment manufacturer) of these crocodile clip leads and makes them at its own licensed factory at Saha, Ambala, Haryana, India. Packs are supplied direct from the maker to schools, science kit assemblers, dealers and importers, with quotations prepared by the manufacturer rather than a trading middleman. Learn more on the ScienceLab profile page.

Related Physics Lab Equipment

Useful with crocodile leads:

- Crocodile Clip — individual clips for making up extra leads.
- Battery Snap with Crocodile Clip — links a snap-terminal battery into clip-lead circuits.
- Stackable Leads — 4 mm plug leads for connections to sockets.
