Description :

Magnetic Wooden Blocks (Product Code: SLE/MG/21) are wooden building blocks withmagnets hidden inside, used in pre-primary and early-years classrooms to combine constructionplay with a first look at how magnets behave. The set holds 30 blocks in six shapes, the largerectangle measuring 10 cm × 3 cm, and every magnet is fully covered by wood, which suits ahands-on preschool science kit. They are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Set contents	30 wooden blocks
Shapes	Six different shapes
Large rectangle	L 10 cm × W 3 cm
Magnets	Covered by wood, giving each block a clean, natural finish
Learning focus	Imaginative design and construction play; introduction to magnets
Product code	SLE/MG/21
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Magnetic Wooden Blocks Used For?

Children build with these blocks exactly as they would with ordinary wooden bricks — towers, bridges, houses and patterns — but soon notice that some faces cling together while others seem to push away. That surprise is the starting point for talking about attraction and repulsion. Ask the group which sides stick, whether turning a block round changes what happens, and how tall a tower can grow before it topples.

The six shapes also support early maths talk: sorting by shape, comparing lengths against the large rectangle, and copying or continuing simple patterns. With the magnets concealed in wood, the set has a calm, natural look that fits Montessori-style and play-based rooms. Supervise young children during play, count the 30 blocks back after each session, and set aside any block that becomes damaged.

OEM Manufacturer

The Magnetic Wooden Blocks are produced by Jain Scientific Equipments Private Limited, trading as ScienceLab, as the OEM, at the company's own licensed factory at Saha, Ambala, Haryana, India. Kindergartens, pre-schools, dealers and importers buy them straight from the manufacturer instead of through a trader.
